Technical Skills

Front-end: React, TypeScript, JavaScript, Next.js, Vite, HTML, CSS, Tailwind CSS, TanStack Query, Zustand, Redux Toolkit
Back-end: C#/.NET, Node.js, Express, NestJS, Java, Spring Boot, REST APIs
Databases and Cloud: PostgreSQL, MongoDB, Convex, Cloudflare R2, Prisma, Entity Framework, Spring Data JPA
Architecture and Communication: SOLID, DDD, RabbitMQ, Redis Pub/Sub, SignalR, Socket.IO
Tools and Testing: Git, GitHub, Docker, Swagger, Orval, Zod, Mockito

Professional Experience

Full Stack Development Analyst, 3Code Sep. 2025 – Apr. 2026

- Developed reusable and configurable components with React and TypeScript, improving interface reuse and maintainability across different platform screens.
- Implemented typed REST API integrations using Orval, Swagger, and TanStack Query, generating types and API client functions from API specifications to reduce repetitive front-end code.
- Contributed to database index creation and standardized API pagination, combining these improvements with TanStack Query caching to reduce the amount of data returned per request and improve screen loading efficiency.
- Developed interactive Kanban boards for CRM and ticketing modules, making it easier to organize and track team requests.
- Developed KPI dashboards for ticket monitoring and enhanced the messaging and template system, improving access to operational information and communication management.
- Structured modular landing pages for platform products, promoting visual consistency and simplifying content maintenance.

Front-end Freelancer, iPrazos Aug. 2025 – Oct. 2025

- Developed a responsive corporate website with Next.js to present the company's services and make information more accessible to potential customers.
- Integrated the website with the CRM API to automate lead routing, reducing manual steps in the lead generation process.

Full Stack Developer Intern, 3Code Jan. 2025 – Aug. 2025

- Developed and maintained user interfaces with React, TypeScript, and Vite, building reusable components and fixing functional and visual issues.
- Developed landing pages with Next.js and technical documentation with Mintlify and MDX, making information about platform solutions easier to access.

Projects

Flock – AI-Powered Event Media Platform

- Developed a full-stack platform with Next.js, Convex, and Cloudflare R2, enabling event guests to upload and share photos and videos through QR codes without installing an app.
- Integrated AI capabilities for image processing and automated event recap generation (Wrapped).

Lyra Chat – Real-Time Chat Application

- Developed a chat application using React, TypeScript, and .NET 8, deployed to production.
- Implemented real-time communication with SignalR, data persistence with PostgreSQL, and authentication with Google OAuth 2.0.

Flow – Real-Time Notification System

- Developed a notification API using Express, TypeScript, Prisma, and MongoDB to manage notification processing.
- Integrated RabbitMQ, Docker-based workers, Redis Pub/Sub, and Socket.IO for asynchronous processing and real-time notification delivery.

Student Council E-commerce Platform – Capstone Project

- Developed a platform using Next.js, NestJS, and MongoDB to digitize the sale of school uniforms and merchandise, replacing manual orders and spreadsheets.
- The website enabled more than 100 sales in its first month by centralizing orders in a digital workflow.

Education

Associate Degree in Systems Analysis and Development, UniAnchieta Jul. 2025 – Present

Technical Diploma in Information Technology, CEFET/RJ Apr. 2022 – Jan. 2025
